

Features

- wear-resistant compact design, with stainless steel 1.4571 monitoring head and housing
- suitable for air, compressed air, nitrogen and oxygen
- 4 ... 20 mA analogue output (4 mA = 0 Nm³/h, 20 mA = operating range final value)
- switching output: switch point can be adjusted steplessly or to 10 predefined values regardless of the actual flow speed
- pulse output: adjustable quantity per pulse
- 10 x LED bar (red, green, orange) which shows the actual flow rate and the status of the switching point or the pulse output configuration
- fluid temperature -10 ... 90 °C
- 4-core PVC cable, 4x0,34 mm², conductor resistance 56 Ω/km
- switching output/pulse output with HighSide-FET output
- protected against short circuits and overloads

	O-ring	FKM (wetted, plug-in and push-in type)	
Weight	plug-in type	approx. 330 g	
	screw-in type	approx. 270 g	
	push-in type	approx. 770 g	

⁽¹⁾ at constant temperature and flow conditions, and stable thermal conductivity

⁽³⁾ delay with the switch point set to 18 Nm/s and the flow at 20 Nm/s, after a sudden complete stop

⁽⁴⁾ the accuracy values were determined under ideal conditions: symmetrical complete flow profile, correct mounting in the pipe, inlets and outlets according to EN ISO 5167-1

⁽⁶⁾ Sensor calibration is performed at approx. 25 °C and approx. 970 mbar abs. in TP-03, inside pipe diameter 29,7 mm (FC50...01/02) and inside pipe diameter 79,2 mm (FC50...00) respectively. Specifications dependent on the measuring range final value always refer to 68 Nm/s (FB2).

Operating ranges

The operating/measuring ranges are determined by the inner pipe diameter (see table). They can be calculated with the following equation:

$$Q = V_N \times A_R$$

Q (Nm³/h) - flow quantity

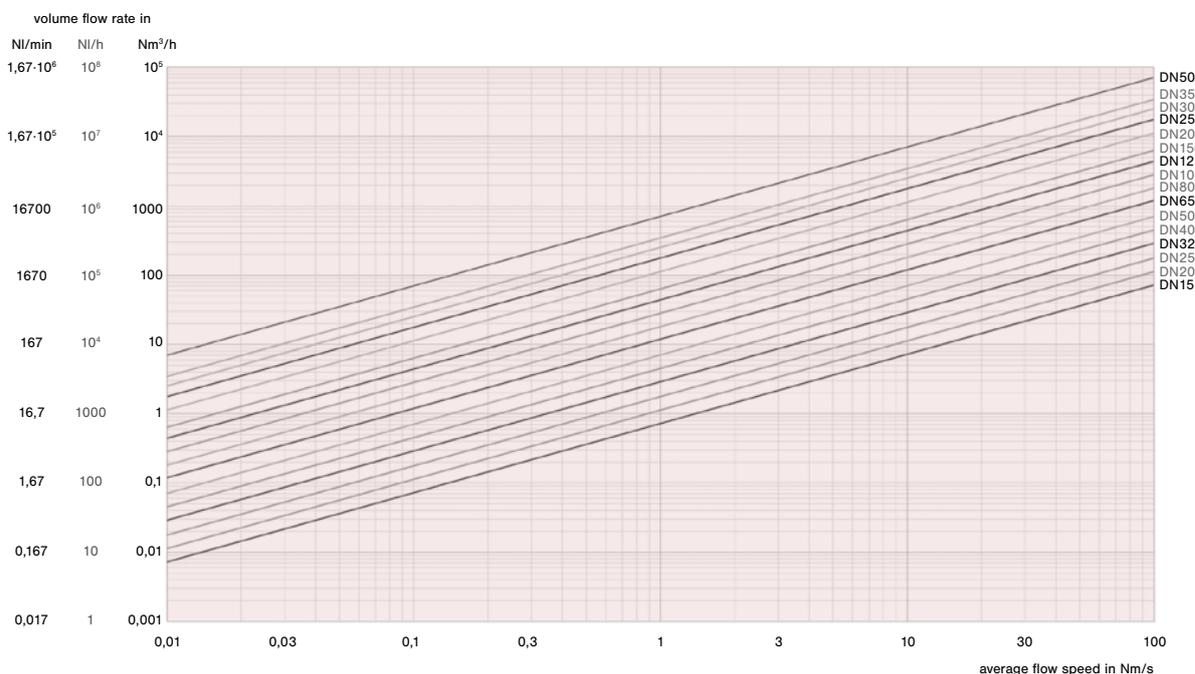

V_N (Nm/h) - average standard velocity

A_R (m²) - inner pipe cross section

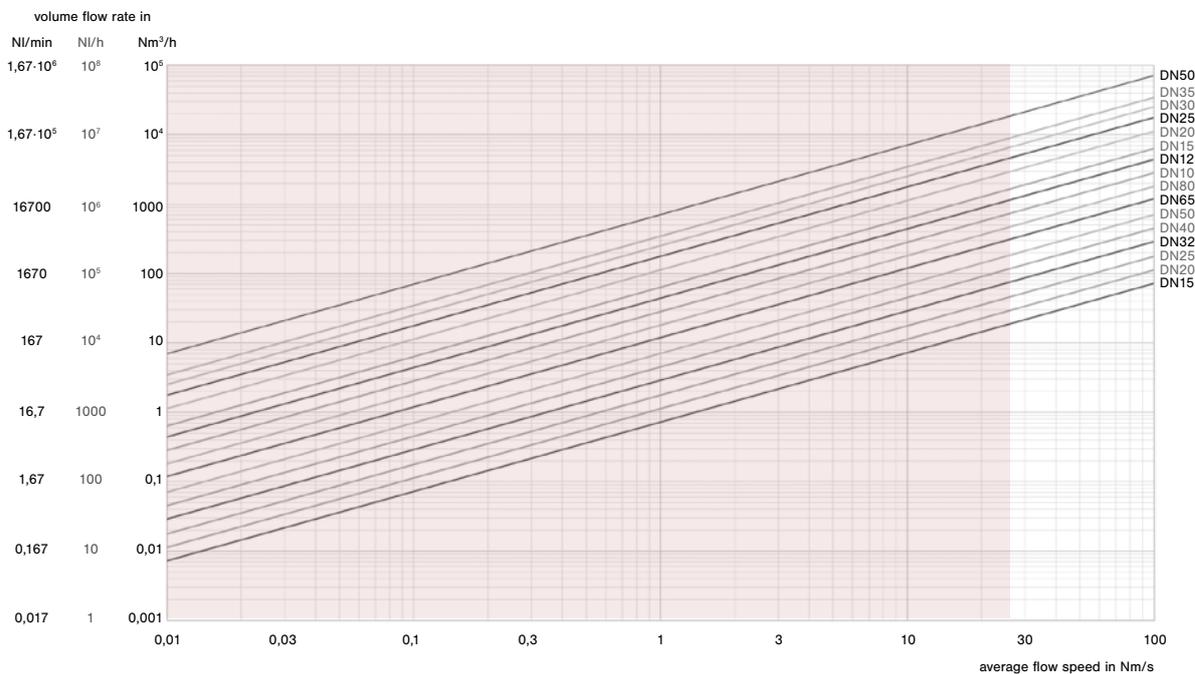

- Standard velocity measuring range (FC50...FB2...): 0 ... 68 Nm/s
- Standard velocity operating range (FC50...FB2...): 0 ... 100 Nm/s
- Standard velocity measuring range (FC50...FB1...): 0 ... 25 Nm/s
- Standard velocity operating range (FC50...FB1...): 0 ... 25 Nm/s

Sensor adapter TP/Ball valve BV

TP-...

BV-...

Features

- Correct positioning of sensor
- Ease of sensor replacement
- Measuring point can be closed if not used
- Sensor adapter available as screw-in or welding type
- Ball valve also serves as a shutoff valve (both input and out output)

Accessories

Description	Ref. No.
Blanking plug, brass, with O ring	0Z121Z000186
Union nut, brass	Y 306 901 01
Blanking plug, stainless steel 1.4571/AISI 316 Ti, with viton O ring	0Z121Z000187
Union nut, stainless steel	Y 306 901 03

Description

Sensor adapters TP and BV facilitate correct positioning and exchange of FC50-EX-CA...11... (plug-in type connection) in pipes with process connection DN 15...DN 50.

Ball valve BV enables pressure-free installation or removal of FC50-EX-CA...11... (plug-in type connection) simply by closing the input and output pipe. The measuring points are suited to temporary measurements; after completion of the measuring cycle they can be closed by means of blanking plugs.

Ordering information – sensor adapter TP/thread
