

Description

Compact single point flow monitor, MIN or MAX monitoring options, suitable for water, oil, air or media with similar thermal conductivities. With screw-in or plug-in type monitoring head for ease of installation and correct positioning.

If the flow rate falls below (MIN-function) or exceeds (MAX-function) the value adjusted by means of potentiometer, the signal output switches to 0 V-level and the yellow LED (Q) lights.

Features

- wear-resistant compact design, with stainless steel 1.4571 monitoring head and housing
- switch point steplessly adjustable by means of potentiometer
- status indication by green LED
- media temperature range -25 ... +100 °C / -13 ... +212 °F
- M12 plug-in electrical connection
- fault indication by yellow LED
- signal output with HighSide-FET output, protected against short circuits and overloads

Sensor adapter TP-.../Ball valve BV-...

TP-...

BV-...

Description

Sensor adapters TP and BV facilitate correct positioning and exchange of CSP monitoring heads, FC03, FC04 or FS10-U1...11 (plug-in type connection) in pipes with process connection DN 8...DN 50. Ball valve BV enables pressure-free installation or removal of CSP monitoring heads and Flow Meter FC03, FC04 and FS10-U1...11 (plug-in type connection) simply by closing the input and output pipe. The measuring points are suited to temporary measurements; after completion of the measuring cycle they can be closed by means of blanking plugs.
